THAMARAIMANALAN R

UX-Focused Product Developer | Computer Science Undergraduate

+91 8220073173 | rthamaraimanalan@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Pre-final-year Computer Science undergraduate at Bannari Amman Institute of Technology (graduating 2028) with hands-on experience in UX-focused product development, interaction design and full-stack engineering. Experienced in simplifying onboarding journeys, improving information accessibility and designing in Figma and Framer, then building the result in React and TypeScript with technical feasibility in mind. Collaborates across frontend, backend and product decisions, learns new tools independently and uses AI tools with critical judgement.

PROJECTS

SkillSync — UX & Full-Stack Developer, Team of 2 *Jun 2026 – Sep 2026*

- Co-designed and built an AI-driven career-readiness platform, translating user needs into intuitive workflows and interactive product experiences, sharing ownership across design, frontend and backend.
- Simplified onboarding by replacing compulsory profile completion with an essential-details-first flow followed by goal-based onboarding, reducing friction at the start of the user journey.
- Redesigned the resume analysis experience by integrating ATS analysis into the same interface, improving information accessibility and reducing navigation between separate sections.
- Designed a personalized learning roadmap and Career Readiness Score to make complex skill-matching insights easier to understand and act on.
- Prototyped in Figma and Framer, built the interface in React and TypeScript with REST APIs, and deployed to production on Vercel.

MathVerse — Software Developer *Mar 2026 – May 2026*

- Developing an interactive mathematics learning platform aimed at improving user engagement through hands-on learning experiences.
- Designed and implemented the core application structure and user interaction flows for the platform.
- Maintained the project with Git/GitHub, making continuous, iterative improvements.

Neural Nexus — AI-Based Digital Heritage — Hackathon MVP, Team Lead *Sep 2025 – Oct 2025*

- Led a hackathon team building a frontend MVP for AI-assisted storytelling of ancient manuscripts and cultural heritage content, coordinating scope and delivery under a fixed timeline.
- Used AI-assisted tools with critical review to prototype quickly, validating and refining generated code.
- Identified gaps in OCR accuracy, backend integration and ML robustness through independent research and defined a roadmap for full-stack implementation.

SKILLS

UX & Design: UI/UX Design, User-Centered Design, Interaction Design, Wireframing, Prototyping
Design Tools: Figma, Framer
Frontend & Development: HTML, CSS, JavaScript, TypeScript, React, REST API Development
Languages: Java, Python, C++, C, SQL
Core Computer Science: OOP, Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems
Developer Tools: Git, GitHub, Vercel

PROBLEM SOLVING

- Solved 200+ LeetCode problems across arrays, strings, recursion and hashing; practicing Java-based DSA and object-oriented problem implementation.

EDUCATION

Bannari Amman Institute of Technology *Jun 2024 – Jun 2028*
B.E./B.Tech, Computer Science and Engineering | CGPA: 8.42/10

The Akshaya Academy *Jun 2023 – Mar 2024*
Higher Secondary Education | 9.0/10

Bhaarath Vidhya Bhavan *Jun 2021 – Mar 2022*
Secondary Education | 9.4/10

CERTIFICATIONS

Oracle Certified Foundations Associate — Oracle

AVAILABILITY

Available for a full-time internship (10–12+ weeks), including Summer 2027 (May/June onward); returning to my degree after.
